# **Hepatitis A**

### 1. What is hepatitis A?

Hepatitis A is a highly contagious (spreads person-to-person) liver disease caused by the hepatitis A virus (germ). Mild cases can last a few weeks while severe cases can last several months.

### 2. How is hepatitis A spread?

Hepatitis A spreads by putting something in your mouth (object, food, or drink) that has been in contact with the feces (poop) of an infected person. Hepatitis A can be spread by:

- Forgetting to wash your hands after using the bathroom or changing diapers
- Having sexual contact with infected partner(s)
- Consuming food or drinks that are contaminated by the virus

### 3. Who is at risk for hepatitis A?

People who are homeless are at higher risk for getting hepatitis A. Anyone can get hepatitis A, but you are at a higher risk if you:

- Travel or live in countries where hepatitis A is common
- Live with someone who has hepatitis A
- Use recreational drugs
- Are men who have sex with men
- Have sexual contact with someone who has hepatitis A
- Are homeless

## 4. What are the symptoms of hepatitis A?

Not everyone shows symptoms. If symptoms develop, they usually appear 2 to 6 weeks after infection. Symptoms can include:

- Fever
  - Feeling tired
- · reemig theu
- Loss of appetite
- Nausea
- Vomiting
- Stomach pain
- Dark urine
- (pee)
- Grey stool
- Joint pain
- Yellowing of the skin and eyes

## 5. How is hepatitis A treated?

Treatment includes rest, good nutrition, fluids, and medical monitoring. Some people may need to be hospitalized. Most people who get hepatitis A recover completely and don't have lasting liver damage. It's important to see a doctor if you have symptoms of hepatitis A.

## 6. How can hepatitis A be prevented?

The best way to prevent hepatitis A is by getting vaccinated. The vaccine is safe and effective. Visit your doctor's office, or call 2-1-1 to find a local clinic or doctor. You can also prevent the spread of hepatitis A by washing hands with soap and water:

- Before eating or preparing food
- After using the bathroom or changing diapers

## Who should get vaccinated?

- All children at age 1-year
- Travelers to countries where hepatitis A is common
- Family and caregivers of adoptees from countries where hepatitis A is common
- Men who have sex with men
- Recreational drug users
- People with chronic liver disease or hepatitis B or C
- People with clotting-factor disorders
- Homeless people
